

## THE GENEOTM DIFFERENCE

### EXFOLIATION + OXYGENATION

Geneo OxyPods gently exfoliate the skin and react with Geneo Primer Gel, creating a bubbly, CO2-rich environment on the skin's surface. The body responds by sending increased levels of oxygen to the skin, which creates ideal conditions to nourish and transform the skin from the inside out.

### NOURISHMENT

Ultrasound waves create micro-vibrations that instantly smooth the skin and increase the permeability of the skin's protective layer, enabling better nutrient absorption.

### SCULPTING

A relaxing hands-free massage sculpts the face, delivering instant reduction of redness and puffiness while infusing Geneo's active ingredients even deeper into the skin.
